

TURKISH STEEL

TRADE DELEGATION USA

TURKISH STEEL

— STEEL EXPORTERS' ASSOCIATION —

Turkish iron and steel industry is one of the leading sectors of Turkish economy. Since its establishment at the beginning of 1920's, Turkish steel industry has seen considerable innovations, reflecting a commitment to respond to the evolutions in global steel markets.

Steel industry in Turkey has witnessed consistent growth, expanding exponentially in response to strong global demand for high quality steel products. Today, with its 24 electric arc furnace mills (EAF), 4 induction furnaces with a capacity range from 80 to 150 thousand tons, and 3 BOF plants with a capacity range from 2.8 to 5 million tons, Turkey's crude steel production has reached to 31.5 million tons in 2015. With these figures, in 2015 Turkey was Europe's second (2nd) largest crude steel producer, and ninth (9th) in the world ranking of steel-producing countries.

Turkey is also one of the biggest exporters of steel products, holding the tenth place among steel exporting countries and second biggest exporter of reinforcement bars used for construction. Turkish steel products have been exported to more than 200 countries and to all regions of the world due to the high quality products, competitive prices and effective marketing strategies.

By organizing this trade delegation to USA, we are aiming to bring American and Turkish companies together to explore areas of cooperation and new business prospects in order to create mutually beneficial and fruitful business relationships that will build a bridge between two countries to bring us even closer.

Namık Kemal EKİNCİ
Steel Exporters' Association
Chairman of the Board

ABOUT STEEL EXPORTERS' ASSOCIATION

Steel Exporters' Association had been operating by the name of Istanbul Ferrous and Non Ferrous Metals Exporters' Association since 1986 which is one of the five associations under the body of General Secretariat of Istanbul Mineral and Metals Exporters' Association (IMMIB). In October 20, 2005, Steel Exporters' Association was established as the sixth association of IMMIB.

The Steel Exporter's Association is a non-profit business association of more than 900 companies representing the largest steel producers and exporters in the Turkish steel industry. Steel Exporters' Association carries on its operations with the aim of increasing the export potential of the Turkish steel industry and it paves the way for Turkish steel producers/exporters, with its main objective to foster and attain sustainable global steel market based on free and fair trade. The Association also solves the problems of its member companies faced at home and abroad, provides contact between members and foreign importers in order to ease the export processes, serves up-to-date domestic and global market news, reports and analyses.

Our mission; "To develop and implement the strategies in order to increase the share of the Turkish steel exports in global markets and to maintain a sustainable global competitive strength."

Our vision; "To direct and assist the members of Turkish steel sector to become a leading country in the global steel trade."

Our values; "Quality, reliability, continuous improvement and innovation."

WHY TURKISH STEEL?

PRODUCTION CAPACITY

Proven to meet growing demand in the future-Turkey is the 9th largest crude steel producer in the world.

Turkey's position on the Aegean Sea and proximity to key industrial markets means it can respond to demand quickly and on time.

PROXIMITY TO MARKETS

MODERN INFRASTRUCTURE

Consolidated investments have provided Turkey with a world-class infrastructure meaning that she can get its steel products faster to market.

Investments in technology provide state-of-the-art production facilities and new production technologies mean that Turkey can offer quality products at consistently competitive prices.

COMPETITIVE PRICING

EXPERIENCED & SKILLED WORKFORCE

Excellent standards of training and education ensure an expert workforce for highest production standards.

Production techniques integrate world-standard technological practices.

LATEST TECHNOLOGIES

CONTINUED INVESTMENTS

Turkey continues to invest in upgrading, enhancing and improving production methods and in innovative products.

The industry is committed to meet all global and local environmental standards and without any recourse to state subsidies. Because 65% of Turkish Steel production is carried out by electric arc furnaces, the average CO₂ emission for producing 1 ton of crude steel in Turkey is 0.69 tons. This compares favorably with the global average of 1.5 tons.

GREENER STEEL

TURKISH STEEL INDUSTRY KEY FACTS AND FIGURES

01 World's 2nd largest rebar exporter

02 World's 9th largest steel producer

03 The world's 10th biggest steel exporter

04 2nd largest producer of steel in Europe

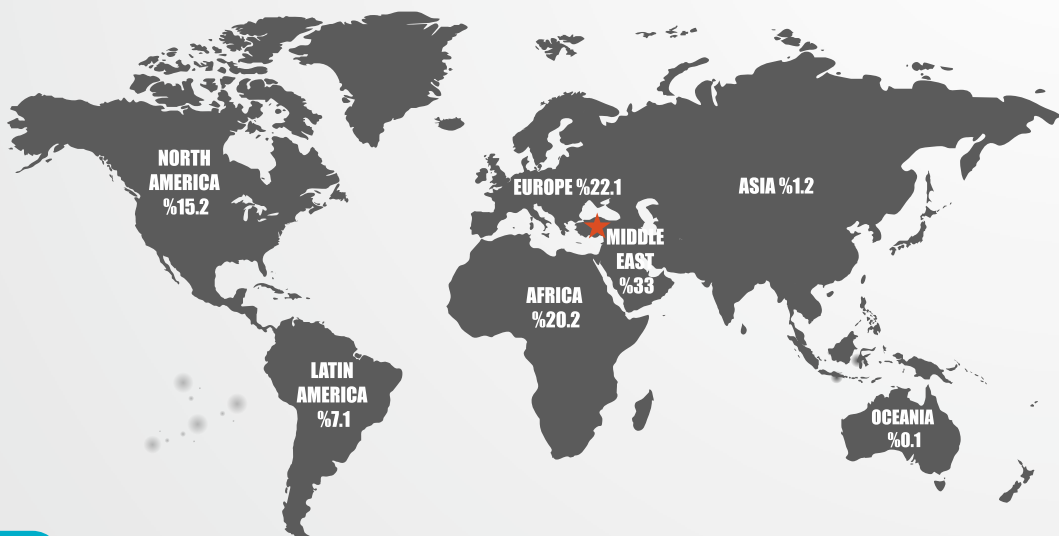

05 Exports to over 200 countries

06 World's largest importer of scrap metal

07 65% of steel production is from steel scrap

08 Turkey's crude steel production is 31.5 million tons in 2015.

TURKEY'S STEEL EXPORT BY REGION – 2015

TURKISH STEEL INDUSTRY

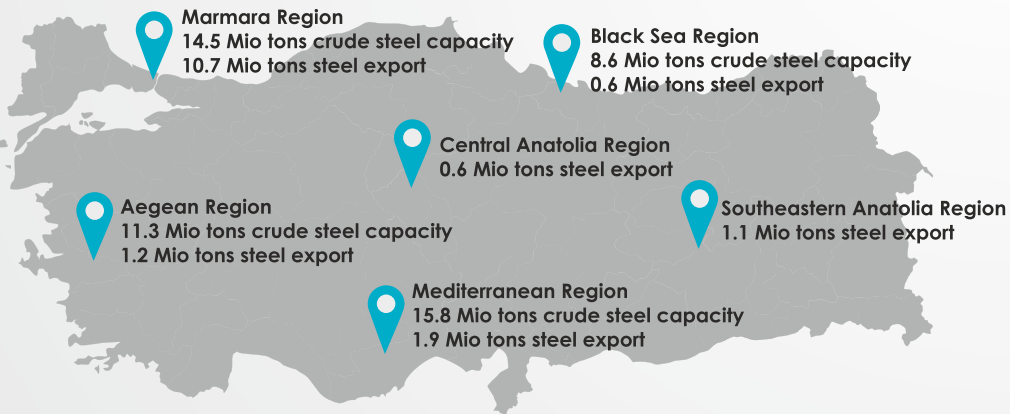

Today Turkey has 24 electric arc furnace mill plants (EAF) and 4 induction furnace plants, with a capacity range from 80 to 150 thousand tons, and its 3 BOF plants have capacities ranging from 2.8 to 5 million tons.

In 2015, global output decreased 1.598 billion tons, down by 3.0% on 2014. Turkey had a 7.4% decrease with 31.517 million tons in year 2015.

In 1996, The European Coal and Steel Community (ECSC) agreement signed between the EU and Turkey. With signing the agreement, customs duties on bilateral steel trade were abolished. The agreement allows Turkey to trade its iron and steel products without customs duty with all EU member states. Additionally, the Government does not subsidize Turkish domestic steel industry due to the European Coal and Steel Community (ECSC) agreement.

All steel companies in Turkey are privately held, and Turkish steelmakers continue to pursue technological developments to enhance the long-term viability of the industry in the global marketplace. The steel industry has become one of the most developed sectors in Turkey and today counts as the fifth largest contributor to the Turkish economy.

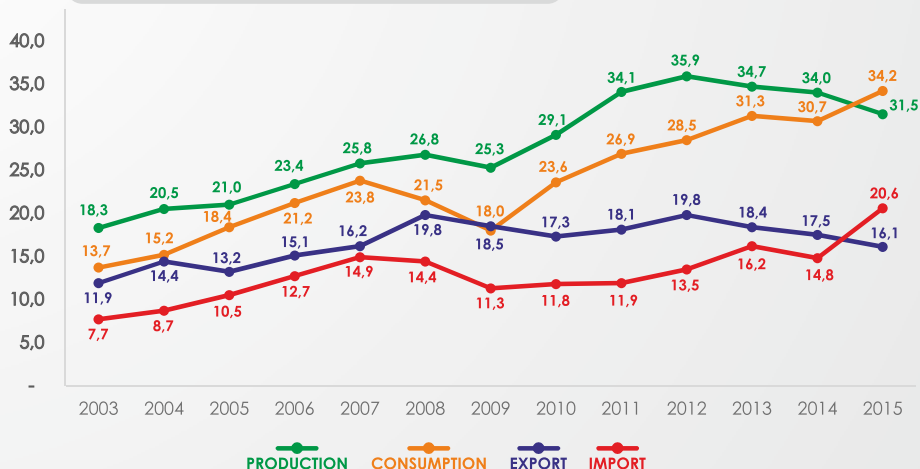

TURKEY'S STEEL MAP 2015

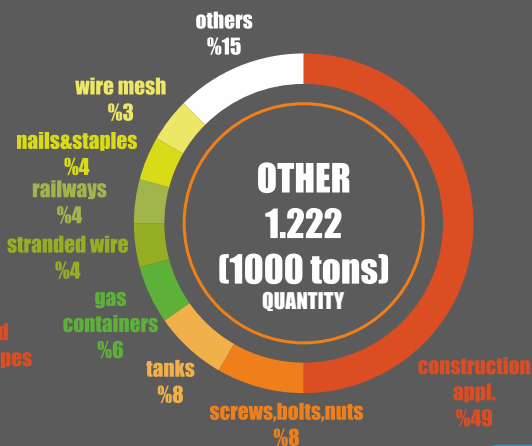

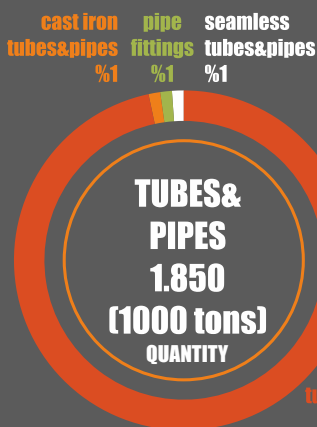

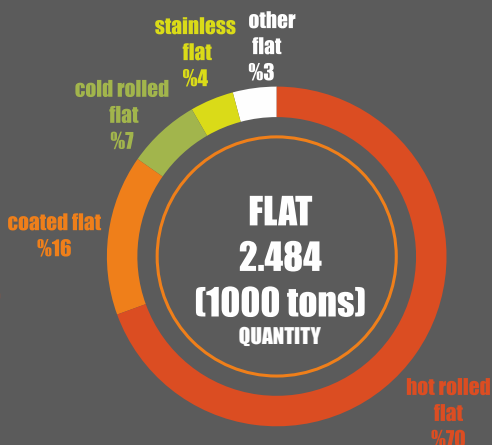

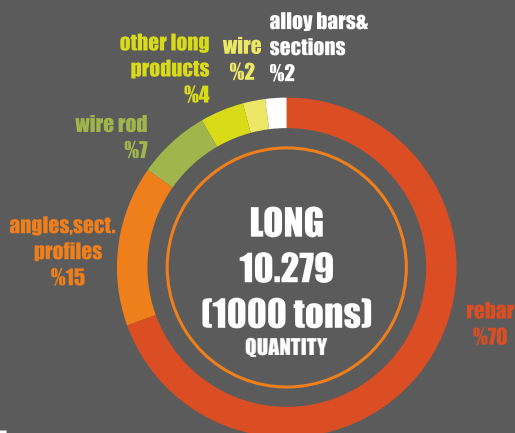

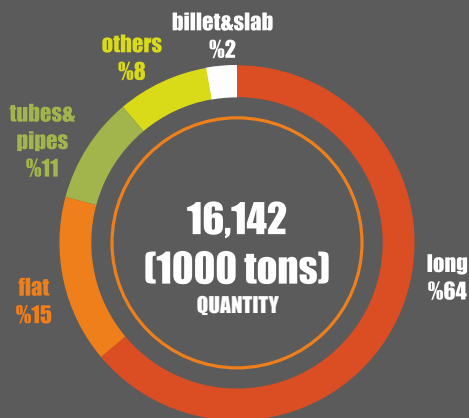

A GROWING INDUSTRY

After 1980, with the implementation of import substitution system, Turkey has increased its steel export to primarily neighboring countries such as Iran, Iraq and North African countries. In the next 20 years, Turkey realized a major production and export boom. While Turkey was the world's 17th biggest crude steel producer in 2000, it has become the 9th biggest producer globally and 2nd largest steel producer in Europe. In fact, Turkey was the third fastest growing steel producer in the world between the period 2001 and 2011, after China and India. Steel production in Turkey has increased significantly since 2001, growing from 15 million tons (mt) in 2001 to 32 million tons in 2015. Growth of the industry in Turkey has been driven by strong domestic consumption. Turkey's crude steel consumption per capita has increased to 436 kg in 2015 and is expected to continue to grow in the medium - long terms. In addition to the strong domestic demand and dynamic steel using industries, Turkey's well placed position also supports exports and production.

1000 TONS	PERIOD	2014	2015	CNG
PRODUCTION	12M	34,035	31,517	-7.4%
CONSUMPTION	12M	30,773	34,362	11.7%
EXPORT	12M	17,525	16,142	-7.9%
IMPORT	12M	14,799	20,628	39.4%

TURKEY'S STEEL EXPORT BY PRODUCT GROUP 2015

TURKEY'S STEEL EXPORT BY PRODUCT 2015

TURKISH STEEL IN THE WORLD

Turkish steel manufacturers have made exports all over the world, due to the competitive prices and effective marketing strategies. According to 2015 figures, Turkey's main export region is the Middle East with 5.3 million tons, constituting 33.0% of Turkey's total steel exports. European Union is another main export destination of Turkish steel exports with 2.8 million tons but Turkey's export to region decrease %0.5 in 2015. On the other hand, due to political instabilities in some of the countries there is 15.9% decrease in Turkish steel export to

MENA region. Emerging regions such as Sub-Saharan Africa is increasingly becoming key destinations for Turkish steel products. In 2015, Turkey exported to 991 thousand tons steel products to Sub-Saharan Africa.

Established in 1984 in Düzce /Akçakoca, Ağır Haddecilik A.Ş. continues to carry out its activities in Dilovası locality of Kocaeli since 2011. Having a total production capacity of 500.000 tons, Ağır Haddecilik produces Patterned floor sheets, Pipe & Profile, Expanded Metal sheets in its facilities, and operates a Steel Service Center in which latest technology cut-to-length lines are in service.

Operating on 45 thousand m2 space with 26 thousand m2 indoor space, our company is located 10 km away from the port, and has export operations to more than 90 countries and 4 continents. Acknowledged not only in Turkey but worldwide for its quality, Ağır Haddecilik is the 4rd largest company in Turkey for flat steel export, and it has demonstrated that to be a global player being the 2nd medium-sized company in Turkey exporting to most countries.

In addition to maintaining its patterned sheet metal production as the leader, our company began producing pipes and profiles and offer its 30 years of industrial experience to its business partners in this new field with state-of-the-art machinery and equipment.

ERCIYAS Steel Pipe Co. was founded with the vision to design, develop, produce, and export cutting-edge steel pipes. ERCIYAS manufactures spirally welded steel line pipes (HSAW), with all types of specified coatings with diameters ranging from Ø10"(273.1mm) to Ø160"(4064mm) and wall thickness ranging from 0.157" (4mm) to 1.38" (35mm). The pipes can be designed and produced using the highest steel grades available up to API 5L X-100.

ERCIYAS is the only company in all of Europe, North America and the Middle East with an annual capacity of 450,000 Mtons under one single roof. The 550 R&D projects completed within the last 3 years are a testament to the company's dedication to the latest technology. Together with a commitment to the strictest quality measures, competitive pricing, as well as geographical advantages, ERCIYAS has risen to the ranks of being not only the #1 pipe exporter in Turkey, but also the #25 biggest exporter in the entire country.

Ersoylar Iron and Steel headquartered in Mersin, Turkey and operating since 1992. The company has been active in the steel production sector manufacturing mainly welded wire mesh, cold drawn bars and coils. With our 3 established factories in Osmaniye, Gebze and Trabzon; in the Mediterranean region, Marmara region and Black Sea region we have over 150 employees and the total production capacity of our company has reached 150,000 metric tons/year, which makes 'Ersoylar Metal' the leading welded wire mesh manufacturer in Turkey.

Apart from manufacturing sector, the company is also the supplier of steel products, like: reinforcement steel bars, wire rod, structural steel, hollow tubes, HRC and plates, profiles, cement supplying top Turkish and foreign construction companies involved in major construction projects in Turkey and abroad, mainly in Middle East, CIS, South America, West Africa, North Africa.

The company is periodically accredited by UKAS BS EN ISO certificate and manufacturing under the quality of BS EN ISO 9001 2008. Quality standards are TS 4559, GOST, Bureau Veritas Conformity which also meet the requirements of BS 4483 and ASTM A 497.

Products : Welded Wire Mesh, Cold Drawn Bars And Coils, Rebars, Wire Rod, Structural Steel, Hollow Tubes, Profiles, Cement

HASÇELİK SAN. VE TİC. A.Ş.

Founded in 1968, Hascelik AS., is the leading special steel manufacturer in Turkey and Europe. With 400,000 tons/year hot rolling round and flat and 250,000 tons/year cold drawing and peeling capacity, Hascelik is the market leader in special steel bar production.

Fully family owned Hascelik exports to more than 60 countries in the world including Americas, Europe, Middle East and Asia. Latest ISO/TS 16949 certification gives Hascelik a new momentum in its progress in automotive and related industries.

SEÇKİNER GROUP

Seçkinler Group is one of the largest distributors in Turkish steel market.

For more than 30 years, prime quality Turkish steel is processed and transferred to the customers.

Our product range includes flat and long steel products, as well as tubes and pipes.

We operate in three cities: Istanbul, Izmit and Konya.

Our steel service center offers;

- Laser cutting
- Plasma cutting
- Oxygen cutting
- Shear cutting
- Bending
- Slitting
- Cut-to-length
- Shot blasting and priming
